
Proposed solution

- ***Problem statement :***

Hazardous area monitoring for industrial plant powered by IoT.

- ***Idea /solution description:***

- Beacon scanners for temperature indication
- Receive Alerts to the mobile through SMS.

- ***Novelty / Uniqueness:***

Bluetooth low energy module in IoT

- ***Social impact / customers satisfaction:***

- Continuous monitoring of Industrial Hazardous area .
- Reliable communication between workers and Fixed base stations.

- ***Business model (Financial Benefit):***

- Low power consumption
- Cost effective
- Easy portable
- Handy

- ***Scalability of solution:***

Scalable
